Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 September 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 33, 34, 37-39, 41 and 42 are rejected under 35 U.S.C. 102(b) as being anticipate by Asakura (JP 09086004A).

With respect to claims 33, 41 and 42, Asakura discloses a recording apparatus comprising:

- A recording head (element 4b), operable to perform a recording operation with respect to a recording medium including a first medium provided as a cut sheet (Fig.2: element 3) and a second medium provided as a rolled sheet form (fig.2: element5b9)
- A first sheet feeder, operable to feed the first medium stacked thereon to a first section in the first direction (Fig.7: element 3a)
- A second sheet feeder, adapted to be detachable attached to an upstream end portion of the first feeder relative to the first direction, and operable to feed the first region via the first sheet feeder (Fig.8: element 5b).

With respect to claim 34, Asakura discloses the second medium is fed to the recording section via the first sheet feeder (Fig.8).

With respect to claim 37, Ikeda discloses the first feeder comprised an edge guide member operable to commonly guide side edges of the first and second medium (fig.4: element 8)

With respect to claim 38, Asakura discloses the second medium is held by the second sheet feeder without a restriction force ((Fig.8: element 5b).

With respect to claim 39, Asakura discloses the second sheet feeder comprises a detachable shaft member adapted to be inserted in a core part of the second medium (Fig.8) and the shaft member comprises a flange member provided in at least one longitudinal end of the shaft member and formed with at least one flat portion (Fig.8: element 15).

2. Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Asakura (JP 0986004A) in view of Ono (JP 408133556A).

Asakura fails to teach third sheet feeder to feed a third medium in a cut sheet form having a length longer than a length of the first medium.

Ono teaches third sheet feeder to feed a third medium in a cut sheet form having a length longer than a length of the first medium (Fig.1: element 7, 8, Abstract).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the third feeder as taught by Ono. The motivation of doing so is the medium stands are extended completely for longer medium.

1. Claim 40 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda Asakura (JP 0986004A) in view of Edatsune (JP 11321016A).

Asakura fails to teach the cutter.

Edatsune teaches the cutter (fig.1: element 37).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have a cutter as taught by Edatsune. The motivation of doing so is to obtain a desired recording result such as a high quality image can be printed at a low cost and the image has no blank portion.

Allowable Subject Matter

2. Claim 36 is allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ly T. TRAN whose telephone number is 571-272-2155. The examiner can normally be reached on M-F (7:30am-5pm).
